

I am requesting that the FCC not implement any proposal that would lessen Indiana's Telephone Privacy law protections. The law here has greatly improved my life by eliminating many time consuming nuisance calls. I used to receive anywhere from 20-30 calls per day. The problem had gotten so bad that I refused to answer the call if caller ID indicated either someone I didn't know or unknown. Now the calls I receive are almost always calls that I want or need to receive. It's not often that I support the State Legislature's actions but this is one that I did and it has worked wonderfully. I recommend to everyone that I know to sign up. Please do not propose anything that will water down the Indiana Privacy law. Thank you!
